

HELP PROTECT

AGAINST HPV RELATED CANCER AND DISEASES

Anyone who has had any kind of sexual activity involving genital contact could be infected with Human Papillomavirus (HPV). In most people, HPV is harmless and has no symptoms, but for some the virus may persist and lead to diseases of the genital area including genital warts and cancers of the cervix, vagina, vulva and anus.

For more information go to www.hpv.com.au

Ask your GP today about ways to help prevent HPV disease. Importantly, women should continue with regular Pap smears.

Seqirus (Australia) Pty Ltd, ABN 66 120 398 067, 63 Poplar Road, Parkville, VIC 3052, Australia. Seqirus™ is a trademark of Seqirus UK Limited or its affiliates. Date of preparation: February 2016. GARD/0216/0019. 13333.
