

KARICARE GOLD+ TODDLER NUTRITIONAL SUPPLEMENT FROM 1 YEAR

Serving Size: Approximately 230mL (1 serve)
Serves per can: 23

A premium toddler nutritional supplement that nutritionally supports the immune system.¹⁻³

Designed to help meet the dietary needs of toddlers from 1 year old whose nutritional intake may not be adequate. It contains no sucrose and is free from artificial colours and flavours.

Nutritionally supports the immune system

- ✓ Contains Nutricia's patented blend of prebiotic oligosaccharides (90% GOS*, 10% lc Polyfructose**), 0.7g per 100mL and LCPUFAs.¹⁻³
- ✓ Enriched with iron, 1.3mg/100mL.
- ✓ Contains vitamin C and zinc.

Supports growth and development

- ✓ The goodness of cows' milk plus other ingredients important for growth and development.
- ✓ One serve per day provides at least 20-50% of the recommended dietary intake (RDI) of 16 essential vitamins and minerals, including iron.
- ✓ Omega-3 DHA[†] (fish oil) may play an important role in brain, eye and nervous system development.⁴⁻⁶
- ✓ Calcium and vitamin D to help promote normal bone and teeth structure.

Nutritional Summary		Average Quantity Per Serve	% Daily Intake Per Serve [#]	Average Quantity per 100mL of prepared drink
Energy	kJ	715		311
	kcal	171		74
Protein	g	6.3		2.8

From 1 year	200mL	4	2									
Product presentation	900g can											

Preparation of Karicare Gold+ Toddler Nutritional Supplement

1. Wash hands before preparing the drink. Wash and rinse cup or bottle and all utensils thoroughly.

2. Using the scoop enclosed, add 4 level scoops of powder to 200mL of drinking water. Fill the scoop lightly using the built-in leveller. For smaller volumes simply add 1 scoop to each 50mL of water.

3. Whisk, shake or stir the mixture briskly to dissolve powder. Serve immediately, or for a cold drink chill in the coldest part of the refrigerator for 1 hour before serving.
For a warm drink, heat slightly before serving.

It is safer to use **Karicare Gold+ Toddler** Nutritional Supplement immediately after it is prepared. Discard unfinished drinks.

PAGE 2/2

BREAST MILK IS BEST FOR BABIES: Professional advice should be followed before using an infant formula. Introducing partial bottle feeding could negatively affect breast feeding. Good maternal nutrition is important for breast feeding and reversing a decision not to breast feed may be difficult. Infant formula should be used as directed. Proper use of an infant formula is important to the health of the infant. Social and financial implications should be considered when selecting a method of feeding.
