## 1 PROJECT

### 1.1 AZ Breast Cancer Detailer

Environment: Veeva GIT: [https://github.com/HealthyDigital/Projects\\_2016.git](https://github.com/HealthyDigital/Projects_2016.git) Branch: dev

### 1.2 Project structure

The project consist of two presentation. The main presentation AZ Breast Cancer and the hidden reference presentation AZ Breast Cancer References (ID:AZANZBREF). For the main presentation the following folders are relevant:

```
Intro
Zoladex
Nolvadex
common
```

Listing 1: Presentation parts

All parts share common javascript, font, css and image files located under \common\Oncology-BreastCommon. These files are linked into the assets of each part through a soft link "shared":

```
drwxr-xr-x 10 admin2-gesine wheel 340 6 Sep 16:07 ..
drwxr-xr-x 7 admin2-gesine wheel 238 4 Sep 17:52 .
-rw-r--r--@ 1 admin2-gesine wheel 8814 4 Sep 17:52 AZ-00-Intro-thumb.jpg
-rw-r--r--@ 1 admin2-gesine wheel 132571 4 Sep 17:51 AZ-00-Intro-full.jpg
-rwxr-xr-x 1 admin2-gesine wheel 5236 4 Sep 12:08 AZ-00-Intro.html
lrwxr-xr-x 1 admin2-gesine wheel 13 4 Sep 11:49 shared ->../../common/
```

Listing 2: Soft link

To build the assets into zips execute the createZips.sh script in the scripts folder of each part inside a terminal:

```
Admin2-Gesine:Intro admin2-gesine$ cd scripts/
Admin2-Gesine:scripts admin2-gesine$ ./createZips.sh
```

Listing 3: Create asset zips

## 2 Healthy Sandbox Environment

Direct upload into test.salesforce.com as clouder

- AZ Breast Cancer (ID:AZAUBC)
- shared resources: OncologyBreastCommon
- AZ Oncology Breast References (ID:AZANZBREF)

## 3 AZ C01 Sandbox Environment

Upload through Vault PromoMats:<https://login.veevavault.com> (Dan.Davis@astrazeneca.com)  
(Please don't migrate the presentation from our CRM to c01 it won't work!)

- AZ Breast Cancer\_1 (ID: AZAUBC1)
- shared resources: OncologyBreastCommon
- AZ Breast Cancer References (ID:AZANZBREF)

### 3.2 CRM synchronisation

When all changes are uploaded to Vault PromoMats and set to STAGED the CRM needs to synchronise the changes to make them available on the iPad. Therefore log into test.salesforce.com as bene@az.anz.c01 and go to "CLM Administration" (it's under the plus in the top level menu) and hit the "Sync" button next to "CLM Subscription History". If the synchronisation was successful the status will be Finished (fig:6) or Failed in case of an error (fig:7). There will be a link to a csv file with some more or less helpful information which data has failed and why.

#### CLM Administration Console

CLM Subscription History <span>Sync</span> <span>Force Full Refresh</span>						
Start Timestamp	User	Status	Refresh Type	Failed Rows	Successful Rows	Message
6/09/2017 15:56	bene@az.anz.c01	Finished	Sync	0	2	Presentations - Upserted: 0, Expired: 0; Slides - Upserted: 0, Expired: 0; Key Messages - Upserted: 2, Expired: 0

Figure 6: Successful synchronisation

6/09/2017 11:18	bene@az.anz.c01	Failed	Sync	<u>2</u>	0	Failed to upsert 2, successfully upserted: 0 records into SF DB. Please see Failed Rows log for more information.
-----------------	-----------------	--------	------	----------	---	---

Figure 7: Failed synchronisation

```
id,refreshId,sfStatus,dataExtId,dataType,message,integrationType
4567,5735,Failed,"50fd68b9-106b-4550-b5d0-12b045f8b184::7627::Staged_vod",
  Clm_Presentation_vod__c,"Error while upserting record 50fd68b9-106b-4550-b5d0-12
  b045f8b184::7627::Staged_vod, Cause: Foreign key external ID: 172_002000014823b::au not
  found for field VExternal_Id_vod__c in entity Product_vod__c",CLM
4568,5735,Failed,"50fd68b9-106b-4550-b5d0-12b045f8b184::9407::Staged_vod",
  Clm_Presentation_vod__c,"Error while upserting record 50fd68b9-106b-4550-b5d0-12
  b045f8b184::9407::Staged_vod, Cause: Foreign key external ID: 172_002000014823b::au not
  found for field VExternal_Id_vod__c in entity Product_vod__c",CLM
```

### 3.3 How to get the Vault PromoMats presentation into production

To get the Vault PromoMats presentation into production Sharon needs to set all assets to APPROVED and synchronise the production system to make the changes available there. **IMPORTANT:** the shared resource asset needs to be set to APPROVED as well. This needs to be done manually otherwise the presentation won't work in production because the latest shared css and javascripts are missing.
